WELCOME TO TLI

We invite you to explore our 2024 brochure, where you'll find detailed information about our academic curriculum and professional courses. We believe our programs offer exceptional quality and value, helping you advance your career in the exciting field of non-invasive aesthetic treatments.

“

I've completed 2 certifications through TLI and plan to do a few more. These are excellent courses! They keep them small and personable so you get more hands-on experience and are able to leave the class comfortable and confident to start incorporating what you've learned into your practice immediately! The instructors and staff are all very friendly and accommodating. I would highly recommend these classes to anyone!

- Zena, TLI Alumni

MESSAGE FROM THE PRESIDENT

Robert E. Logue, JD

We are thrilled to learn of your interest in non-invasive cosmetic procedures and warmly welcome you to grow your career in this rewarding and rapidly advancing profession.

At the Texas Laser Institute (TLI), our mission is to provide exceptional value to the industry by combining an uncompromised curriculum with the expertise of our highly experienced instructors. Our practical course selection and affordable pricing are designed to meet your career advancement needs.

We are confident you'll appreciate the convenience of our online course materials and benefit from our extensive hands-on training.

We believe that the greatest challenge to the enjoyment of aesthetic treatments is ensuring that every client receives an exceptional experience. When providers are well-informed and skilled in balancing safety with effectiveness, our entire profession benefits.

At TLI, we strive to be your trusted partner for training in minimally invasive cosmetic procedures and for raising the standard of care in our industry. Join the over 10,000 leading practitioners who have started or expanded their careers with the support of our dedicated instructors and outstanding facilities.

Welcome once again to Texas Laser Institute! We hope you find our college brochure informative, and we look forward to being a continued resource for your professional growth and development.

WHY CHOOSE US

Ready to jump-start your career?

Innovative and entrepreneurial in spirit, Texas Laser Institute leverages its access to advanced laser technology, experienced instructors, and proximity to one of the nation's top medical centers to attract exceptional faculty and students.

Texas Laser Institute is dedicated to educating the next generation of aesthetic laser professionals for the 21st century—preparing men and women to lead the field in light-based aesthetic treatments, neurotoxins, and facial fillers with vision and expertise.

OUR MISSION

Commitment to providing excellence

1. Foster an academic environment that promotes freedom of thought, speech, and inquiry, emphasizing tolerance, respect, diversity, and professional growth.
2. Offer innovative programs that encourage analytical and creative thinking, enabling students to make informed and ethical decisions.
3. Support a highly qualified, entrepreneurial faculty known for excellence in teaching, capable of offering diverse intellectual and cultural perspectives, and responsive to students' professional development needs.
4. Uphold a reputation for superior education, solidifying our position as a leading authority in safe, effective non-invasive cosmetic procedures.

OUR INSTITUTE

The Texas Laser Institute, founded in 2011, is a result of a steadfast commitment to providing excellence in training and certification for aesthetic professionals.

State-Approved Career School & College

Texas Laser Institute, headquartered in Houston, Texas, is located just outside the renowned Texas Medical Center. Our state-of-the-art classrooms and conference facilities are complemented by a clinical medical spa environment, where students gain hands-on experience with advanced treatments.

We offer a wide range of sophisticated laser and minimally invasive aesthetic devices, including Alexandrite and Nd:YAG laser systems, IPL machines, body contouring devices, tattoo removal lasers, SkinPen, microdermabrasion machines, fibroblast technology, as well as neurotoxins and facial fillers. Students also have access to advanced cooling modalities for enhanced epidermal protection and patient comfort.

Texas Laser Institute takes a holistic approach to education, offering comprehensive instruction and professional development. Our 40-hour laser hair removal program, approved by the Texas Department of Licensing and Regulation (TDLR), provides state-approved training and certification, enabling students to become Certified Laser Hair Removal Technicians. Additionally, our curriculum meets the Texas Medical Board's requirements for practitioners to perform delegated treatments such as Botox®, facial fillers, body contouring, tattoo removal, IPL photofacials, and certain skin exfoliation procedures.

The Institute's headquarters, located in Houston's Medical Center, provides students with free off-street parking and convenient access to local restaurants, hotels, and public transportation. Boasting nearly 2,000 square feet of training space, fully equipped treatment rooms, and experienced physician medical directors, the Institute is well-equipped to deliver comprehensive training and certification. TLI also has locations in Dallas, Austin and flexible training spaces available in NYC and Miami.

OUR LOCATIONS THROUGHOUT TEXAS

Houston

A sprawling metropolis that stretches to the pristine Galveston Bay. At the heart of this vibrant city lies a bustling downtown, home to an array of cultural gems, including the renowned Theatre District, Grand Opera, and Historic District. Explore the city's rich 19th-century architectural heritage and eclectic mix of upscale restaurants and foodie havens.

Dallas

Dallas, Texas, is a dynamic city renowned for its impressive skyline, thriving arts district, and rich history, including the iconic Dealey Plaza. The city offers a unique blend of modern attractions and Southern charm, with world-class shopping, dining, and entertainment options.

Austin

Austin, Texas, is a lively city known for its vibrant music scene, rich cultural diversity, and a thriving tech industry that has earned it the nickname "Silicon Hills." With its beautiful outdoor spaces, including the scenic Lady Bird Lake and Barton Springs, Austin seamlessly blends urban excitement with natural beauty.

AT A GLANCE

- 10,000+ Students Served Across Texas
- Thought Leaders in Aesthetics
- Innovative Course Offerings
- Training Centers in Houston, Dallas & Austin
- Industry Leading Instructors
- State-of-the-Art Training Facilities
- The Association of Laser Hair Professionals
- Job Boards and Career Placement Insights

INDUSTRY GROWTH

According to the Texas Workforce Commission, the field of aesthetics is projected to grow by 18% from 2022 to 2032, significantly outpacing the average growth rate for all occupations. On a national level, about 14,000 openings for skincare specialists are expected each year over the next decade, primarily due to the need to replace workers who retire or move to other fields.

The Bureau of Labor Statistics (BLS) highlights that Texas boasts the highest number of employed skincare specialists in the U.S., with the Houston metropolitan area ranking fifth nationwide for this occupation. In Texas, the demand for skilled aestheticians continues to rise, reflecting a growing interest in non-invasive cosmetic treatments.

Aestheticians in Texas can anticipate an average annual salary of \$39,000 and an average hourly wage of \$18.75. Additionally, many professionals in the field benefit from additional income through gratuities and commission plans, which can significantly enhance their total earnings. This trend underscores the strong career prospects and financial potential in both Texas and across the nation.

OUR TEAM

Robert E. Logue, JD
President

Robert Logue, who has built one of Houston's largest hair removal providers and achieved a multimillion-dollar exit, brings nearly two decades of expertise in the safe and effective use of laser technology, particularly in laser hair removal. He plays a key role in the ongoing development of course materials for the Texas Laser Institute. In addition to his industry experience, Mr. Logue is a licensed attorney in the state of Texas.

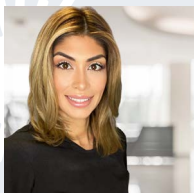

Nohely Diaz, M.e.d
Director of Admissions

As the College Director, Nohely serves as an invaluable resource for our students, offering expert guidance throughout the enrollment process. With her extensive background and advanced training in education, Nohely has honed a remarkable ability to support and guide students through every step of their academic journey. Fluent in English and Spanish, Nohely ensures that every student receives the comprehensive assistance needed to succeed.

Candice Morrision
Director of Education

Mrs. Morrision is a Licensed Aesthetics and Laser Instructor at the Texas Laser Institute's Dallas office. With a distinguished career, she has delivered keynote speeches at numerous conferences and travels extensively throughout Texas to introduce students to light-based aesthetics. As a global mentor to aestheticians, Candice is instrumental in shaping our college curriculum and ensuring the continuous professional development of our faculty.

Laura Ruiz
Director of Admissions

In addition to leading our Dallas based instructors, Laura serves as an integral member of our administration team - ensuring that each and every student gains an in-depth understanding of the aesthetic industry as well as an enjoyable understanding for our classes, the regulatory environment, and our training capabilities to best accelerate professional growth with confidence and care.

INSTRUCTORS

Our faculty is actively engaged in practicing aesthetics and serves as a repository of extensive industry knowledge. We believe that their hands-on experience and deep understanding of the field not only enhance their own expertise but also significantly enrich the learning experience for our students.

Ana Cardona - Lead Aesthetic Laser Instructor

Mrs. Cardona, a seasoned professional, is a Lead Aesthetic Laser Instructor at TLI with over a decade of experience. Holding registrations as an Aesthetic Laser Instructor and a Professional LHR Technician, she passionately guides the next generation of technicians in Texas. Fluent in both Spanish and English.

Kathy Haney - Master Certified Injector & Skincare Specialist

Mrs. Haney is a highly skilled Medical Aesthetician based in Houston, Texas. As a Master Certified Injector of Dermal Fillers and Neuromodulators, she is also a distinguished Skincare Specialist. Kathy is a leading expert in facial sculpting and has been a pioneer in esthetics, notably introducing Radiesse® injections to Houston. She was among the first in the U.S. to utilize Restylane® Lyft and Dysport®.

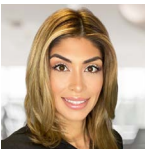

DeAnn Lopez - Lead Aesthetic Laser Instructor

DeAnn is a seasoned aesthetic professional with over 15 years of experience, initially specializing in acne treatment and comprehensive skin rejuvenation. As an esthetician, eyelash extension specialist, and licensed professional laser hair removal technician, she brings a wealth of expertise to our classrooms.

Lisa Ragsdale - Lead Aesthetic Laser Instructor

Lisa, a highly respected registered nurse with over 30 years of experience, is a leading expert in aesthetic medicine. As the owner of a successful cosmetic injectable business in Flower Mound, TX, she has dedicated the past decade to this vibrant field. Lisa's mentorship and preceptorship have significantly influenced the careers of numerous aspiring healthcare professionals.

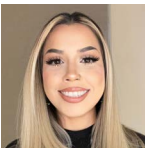

Laura Ruiz - Master Certified Injector & Skincare Specialist

Laura, a Dallas native, is a seasoned cosmetologist with over 15 years of experience. Holding licenses in cosmetology, professional laser, and phlebotomy, she offers a well-rounded expertise. Laura is passionate about sharing her knowledge and techniques with students, finding great fulfillment in her role. She takes pride in being a valued member of the Texas Laser Institute family.

Christen Alvarez - Lead Aesthetic Laser Instructor

With over 20 years in the industry, Christen is a highly experienced aesthetic professional. Her extensive background in skincare sales and training allows her to effectively educate physicians, staff, and patients on medical aesthetic procedures. Skilled in laser, light, and energy devices, she excels in providing exceptional training and education.

Krista Wheeler - Lead Aesthetic Laser Instructor

Krista started her aesthetic career at the renowned Aveda Institute, graduating in 2020 with success. She obtained her Laser Professional certification that same year. Passionate about skincare, she aids clients in feeling confident. Teaching and assisting others in skin rejuvenation is one of the most rewarding aspects of her profession.

STUDENT TESTIMONIALS

Training programs making significant impacts to our graduate students.

At the Texas Laser Institute, we take pride in offering courses designed to provide a personalized and intimate learning experience. Our classes are intentionally small, typically ranging from three to fifteen students, to ensure that each learner receives the focused attention necessary for their success.

By keeping our student-to-teacher ratio low, we cultivate an environment that promotes collaboration and cooperation—essential for achieving the best results and developing skills that will serve our graduates well throughout their careers. Our dedicated instructors provide individualized feedback and support, tailored to each student's growth and development.

Our faculty, known for their expertise and leadership in their fields, engage in high-quality scholarship that not only deepens their own understanding but also enhances the learning experiences of our students. Through our carefully crafted training programs, students acquire specialized knowledge and skills that distinguish them from other candidates, unlocking exciting opportunities for career advancement.

At the Texas Laser Institute, we are committed to delivering an exceptional education that blends real-world experience with practical knowledge, ensuring that our students are fully equipped to excel in their chosen professions.

“

If it wasn't for taking Texas Laser Institute's Laser Hair Removal courses eight years ago - I wouldn't have built and sold three very successful businesses. It's hard to even express how life changing it was for my daughter and I!

- Chelsea L.

”

“

I am an esthetics instructor and I highly recommend this school. Informative, efficient, professional, and well worth the price. There are other laser schools that charge twice as much, but don't fall for the hype. This is the best and doesn't over charge your for things you don't need.

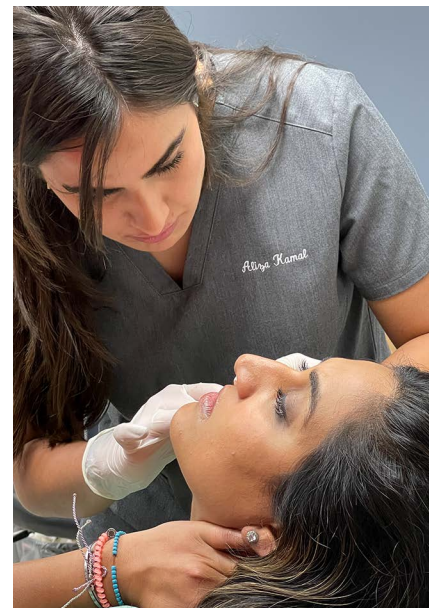

- Patricia W.

”

DID YOU KNOW?

At Texas Laser Institute, we provide affordable, high-quality laser technology courses across Texas. Our experienced instructors and state-of-the-art facility offer hands-on training in key areas such as laser hair removal, tattoo removal, and skin rejuvenation. We are dedicated to making top-notch education accessible to everyone, maintaining our commitment to delivering exceptional training at a cost-effective price.

OUR INSTITUTE

A number of ways to continue your training at TLI.

We offer a wide range of course options that provide a tailored approach to best fit your professional interests and career goals. Our comprehensive course programs provide you with the tools necessary to elevate your practice within a core area of service offerings.

LASER CERTIFICATION COURSES

Discover the latest advancements in laser technology by integrating theory with practical application. In our program, you'll conduct client consultations, perform hands-on procedures that balance safety and effectiveness, and learn to address treatment complications. Additionally, you'll gain valuable expertise in essential practice setting considerations.

- **Laser Hair Removal**
- **Body Contouring & Skin Tightening**
- **IPL Photofacial & Skin Rejuvenation**
- **Laser Safety Officer**
- **Tattoo Removal**

MEDICAL LEVEL AESTHETICIAN ACADEMY

Medical or paramedical aestheticians are skincare specialists with a clinical focus on treating specific skin conditions, such as acne, hyperpigmentation, and textural issues. They offer additional expertise in optimized cleansing, moisturization, and reversing the signs of aging, providing patients with comprehensive skincare solutions.

- **Dermaplaning & Chemical Peels**
- **Fibroblast Plasma Lift**
- **Microneedling & Microdermabrasion**

“

I earned my 100 Treatment Practicum! The instructors were absolutely amazing and made my experience professional and fun! I would recommend any future laser technician at Texas Laser Institute. Thanks again! I cannot wait to come back and complete my training!

- Maegan E.

”

PERMANENT MAKEUP ACADEMY

A rapidly evolving field, permanent cosmetics is perfect for Professional Estheticians, Permanent Makeup Artists, Cosmetologists, and Beauticians. With the right training, expertise, and marketing acumen, you can build a successful career in permanent cosmetics and seize outstanding opportunities in this dynamic industry.

- **BB Glow**
- **Microblading**
- **Semi-Permanent Eyebrow Shading and Ombré**
- **Semi-Permanent Makeup Classic Eyeliner and Full Lips**

INJECTABLE ACADEMY

Neurotoxins and hyaluronic acid (HA) facial fillers are among the most sought-after non-surgical cosmetic treatments globally, with the market for these procedures growing rapidly. According to ASPS, neurotoxin procedures alone increased by 6% in the past year, and the global dermal fillers market is projected to reach \$7.8 billion by 2027, driven by rising demand for non-invasive aesthetic treatments. Enhance or expand your expertise in these popular services with our advanced training, which emphasizes in-depth product knowledge and extensive hands-on practice.

- **Neurotoxin & Facial Fillers - Beginner**
- **Neurotoxin & Facial Fillers - Advanced**

THE FOUR LEVELS OF LHR LICENSURE

The State of Texas stands out as one of the few states with a clearly defined set of rules and regulations governing the practice of laser hair removal. In Texas, there are four distinct levels of licensure for laser hair removal professionals, each designed to ensure comprehensive standards and practices.

LEVEL 1: Certified Laser Hair Removal Technician: Apprentice-in-Training

As an apprentice in training, you are authorized to perform treatments in accordance with the facility's written operating procedures, but only under the direct supervision of a Senior or Professional Laser Hair Removal Technician. This means a licensed Senior or Professional Laser Hair Removal Technician must be present in the treatment room and supervise you while you perform any procedures. To advance to the next licensure level, you must complete 100 supervised treatments and submit the required application to TDLR.

LEVEL 2: Certified Laser Hair Removal Technician

As a Technician, you are allowed to perform treatments without the direct supervision of a Senior or Professional Technician. However, a Professional Technician or Consulting Physician must be present on-site while you are administering treatments. To advance to the next level, you need to supervise 100 treatments, audited by a Professional Technician, and submit the required application to TDLR.

LEVEL 3: Certified Senior Laser Hair Removal Technician

As a Senior Technician, you can provide direct supervision for an Apprentice-in-Training and sign off on their 100-treatment log, enabling them to upgrade to the Technician level. Additionally, you are authorized to assume the responsibilities of a Professional Laser Hair Removal Technician for up to 44 days if the assigned Professional Technician is no longer available. To advance to the next level, you must pass the Professional examination from an approved Certifying Entity, such as the Texas Laser Institute.

LEVEL 4: Professional Laser Hair Removal Technician

As a registered Professional, you can fulfill the required roles and responsibilities to ensure a laser hair removal facility maintains its proper licensure. You are also permitted to perform treatments without the on-site presence of another Professional or Physician. In addition, you can supervise treatments performed by an Apprentice-in-Training and audit the 100-treatment log sheets necessary for their or a Technician's licensure upgrade. To advance to the next level, you must pass the Professional examination from an approved Certifying Entity, such as the Texas Laser Institute.

Laser Hair Removal in Texas is regulated by the Department of Licensing and Regulation. For state-provided forms, rules, and regulations, visit: www.tdlr.texas.gov/las/las.htm.

Note: These regulations apply only to Texas. If you are practicing in another state or country, you should consult your local regulatory authority (such as the medical board, cosmetology board, or health department) for the specific rules and regulations that apply to your location.

LASER HAIR REMOVAL CORE CURRICULUM

In Texas, advancement in the field is sequential and cannot be bypassed. For instance, to become a Professional Technician, you must first achieve Senior Technician status. Before reaching Senior level, you need to be a Technician, and to become a Technician, you must start as an Apprentice. So, let's answer the question, "where should I begin?"

STEP 1

40-Hour Laser Hair Removal (Apprentice-in-Training)

The first step is to complete the Texas-required 40-Hour Laser Hair Removal course from a Texas-approved educational provider, such as the Texas Laser Institute. This fundamental course covers essential considerations for performing safe and effective laser hair removal procedures.

STEP 2

100 Treatment Practicum

After completing your 40-hour class, you progress to becoming a Technician by performing 100 supervised treatments. These treatments cover various body areas, such as lower legs, chin, underarms, and bikini, among others. They must be supervised by either a Senior or Professional Laser Hair Removal Technician. Once the treatments are properly recorded, you can submit an application to TDLR to upgrade your license.

After receiving your certification from TLI upon completing the 40-hour course, you may immediately begin performing your first 100 treatments. However, TDLR no longer permits processing both applications simultaneously, so you should submit your Technician application only after your Apprentice-in-Training license has been issued.

STEP 3

Senior Laser Technician

To become a Senior Technician, you must supervise 100 treatments, which must be audited by a Professional Technician. At TLI, we will supply you with the necessary 100 treatment log sheets and the corresponding state application, making it easy for you to submit the completed records to TDLR.

STEP 4

Professional Laser Technician

In Texas, the Professional level is the highest certification available. To achieve this, you need to pass the Certification Examination administered by a state-approved Certifying Entity, such as the Texas Laser Institute. After passing the exam, you'll submit a copy of your certification along with the required application to TDLR to upgrade your licensure from Senior to Professional.

Our laser instructional educational courses have received high praise from hundreds of students, who consider them the most exceptional learning experiences they have ever encountered.

40-HOUR LASER HAIR REMOVAL APPRENTICE-IN-TRAINING (HYBRID)

Laser hair removal technicians safely and effectively remove unwanted body hair using state-of-the-art laser and IPL systems. When performed optimally, customers can enjoy significant hair reduction on nearly all parts of the body, with commonly targeted areas including the legs, back, face, underarms, and bikini area.

The 40-Hour Laser Hair Removal certification program is the first step toward becoming licensed in the State of Texas and meets the training requirements for several other states. This course covers the essential study of laser mechanics, as well as the physiology and techniques needed to excel as a laser hair removal professional. The comprehensive 4-day, 40-hour program includes certification as a Laser Safety Officer (LSO), all necessary course materials, certificates, and CPR certification.

ADMISSION REQUIREMENTS

- Minimum age for admissions is 18 at the time of enrollment.
- Students must have earned a high school diploma, GED or equivalent.
- Proficiency in the language of instruction - either English or Spanish.

EQUIPMENT ACCESS

Our students enjoy access to our state-of-the-art facilities, with several of the most sophisticated aesthetics machines available:

- Long pulse Alexandrite Laser Systems
- Long pulse Nd: YAG Laser Systems
- Diode Laser Systems
- Epidermal Cooling Systems

TUITION FEE INCLUDES

- Comprehensive Course Materials & Videos
- Model Intake and Consultation Forms
- Model Informed Consent Agreement
- Laser Safety Officer (LSO) and CPR Certification
- In person, two day applied hands-on training
- Certificate of Completion

TUITION

\$950

CLASS DAYS

The 40 Hour LHR course offers a dynamic blend of online and in-person instruction, providing students with a comprehensive learning experience.

Through our online/in-person hybrid format, students are able to access a range of online videos, course materials, and chapter assessments, available 24/7 through TLI's innovative student portal, completing the didactic component at one's own pace of study.

Upon completing the online modules, students participate in an intensive two-day hands-on training course. This in-person training offers a valuable chance to apply the knowledge learned online, allowing students to gain real-world experience in a practical setting

COURSE OBJECTIVES

01

Build a solid foundation in the theory and science of laser hair removal, while engaging in practical hands-on exercises to learn how to perform safe and effective treatments.

02

Conduct client consultations, review pre and post-treatment considerations, obtain informed consent, and apply optimized treatment settings based on written treatment

03

Acquire the knowledge needed to manage treatment complications, perform CPR effectively, and fulfill the responsibilities of a Laser Safety Officer.

04

Understand practice setting considerations and how to operate within the standard of care. Learn about regulatory considerations and how to implement best business practices.

ACHIEVEMENT

A certificate from the Texas Laser Institute as a Certified Laser Hair Removal Technician is awarded to individuals upon completion of the necessary coursework, hands-on practice, and passing the final examination, administered on the last day of training.

Please note that this certificate represents the first level of training required to fulfill the licensure requirements as a Laser Hair Removal Technician in Texas, initially at the Apprentice-In-Training level. Most students choose to continue their training to become fully licensed as a Certified Laser Hair Removal Technician. To achieve this, students must complete an additional seminar—the 100 Treatment Practicum—which involves completing 100 treatments, typically within a single day.

The initial training plan is:

1. Completion of the 40-hour Laser Hair Removal certification program.
2. Completion of the one day 100 Treatment Practicum.
3. Submit an application on-line to TDLR (State of Texas) for both your Apprentice and Technician levels of licensure - including your 40 Hour Certificate, 100 treatment log sheets, state applications, ID, and state licensure fees. You do not need to first complete your 100 treatments, however, in order to submit for your licensure as an Apprentice-In-Training.
4. Receive your license from TDLR (Texas) as a Laser Hair Removal Technician. Usually processed within just 3 business days.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

Complete course calendar is available on our website or by contacting our office. We're here to assist you!

Office: (832) 767-0977

Web: www.texaslasers.com

100 TREATMENT PRACTICUM

Laser hair removal technicians safely and permanently remove body hair using state-of-the-art laser and IPL machines. Laser hair removal (LHR) can be safely performed on almost all parts of the body and is most commonly used to remove hair from the legs, back, face, armpits, and bikini area.

The Laser Hair Removal - 100 Treatment Practicum course offers hands-on training focused on the mechanics of lasers, as well as the physiology and techniques necessary to excel as a laser hair removal technician. Students have the opportunity to complete their first 100 treatments at TLI's facility.

Typically completed in a single day, the 100 Treatment Practicum is conducted under the direct supervision of either a Registered Senior or Registered Professional Laser Hair Removal Technician. Completing the 100 Treatment Practicum at our institute allows you to expedite your registration status to that of a Registered Certified Laser Hair Removal Technician in the state of Texas.

ADMISSION REQUIREMENTS

- Completion of state approved and recognized 40 hour laser hair removal training.
- The minimum age for admissions is at least 18 years of age at the date of application.
- Students must have attained a high school diploma, GED, or equivalent.

EQUIPMENT ACCESS

Our students enjoy access to our state-of-the-art facilities, with several of the most sophisticated aesthetics machines available:

- Long pulse Alexandrite Laser Systems
- Long pulse Nd: YAG Laser Systems
- Diode Laser Systems
- Epidermal Cooling Systems

TUITION FEE INCLUDES

- Comprehensive hands-on practicum in the completion of 100 directly supervised treatments.
- Perform guided consultations, including best practices when reviewing the risks, benefits and alternatives to laser hair removal ("informed consent").
- Performance of safe and effective treatments.
- Application of post-treatment care, considerations of complications, and proper follow-up instructions.
- Treatment logs for completion of licensing application.

TUITION

\$750

CLASS DAYS

After completing the 40-Hour Laser Hair Removal course, you can finish the 100 Treatment Seminar in just one day, offering a hands-on and focused learning experience.

To complete 100 treatments, at least four suitable models are needed. Students are encouraged to invite family and friends, or TLI can provide models.

Class dates and online enrollment options are available on our website. For alternative class dates that suit your schedule, please feel free to contact us.

We offer classes seven days a week.

COURSE OBJECTIVES

01

Students gain a comprehensive understanding for the principles and practice of Laser Hair Removal through extensive demonstration and hands-on practice.

02

Practice conducting client consultations, reviewing pre and post-treatment considerations and obtaining informed consent agreements.

03

Apply theoretical knowledge to achieve an optimal balance of safety and effectiveness by considering factors such as pulse duration, spot size, fluence, and hertz rates.

04

Review facility considerations to maintain the industry's standard of care for the safe use of aesthetic medical laser systems.

ACHIEVEMENT

The 100 Treatment Practicum is the second course required to achieve licensure as a Laser Hair Removal Technician in Texas.

Upon completion, you can submit your treatment logs to TDLR, along with the necessary application and fee, to upgrade your license to Certified Laser Hair Removal Technician.

As a Technician, you will no longer need direct supervision by a Senior or Professional LHR Technician when performing treatments. However, a facility's Professional LHR Technician or Consulting Physician should remain on-site while you are performing treatments.

The registration process:

1. Completion of a 40-hour Laser Hair Removal Apprentice-in-Training program must first take place.
2. Then you may enroll and complete the one day 100 Treatment Practicum.
3. Submit application(s) to TDLR - either simultaneously if registering with TDLR as an LHR Technician for the first time, including your Apprentice-in-Training application, or send just your Technician application if already licensed as an Apprentice-in-Training.
4. Receive your license from TDLR as a Certified Laser Hair Removal Technician. Now with mandatory online application processing, TDLR usually processes your application in no more than a few business days.

To get started, enroll online today at www.texaslasers.com.

Complete course calendar is available on our website or by contacting our office.

We're here to assist you and look forward to speaking with you soon!

Office: (832) 767-0977

E-mail: enroll@texaslasers.com

Web: www.texaslasers.com

SENIOR LASER TECHNICIAN

The Senior Laser Hair Removal seminar provides the opportunity to directly supervise 100 treatments, as performed by another licensed or eligible Laser Hair Removal Technician.

Through the completion of this seminar, you transition from student to teacher, as you utilize your experience and knowledge to guide the educational experience of a fellow student. By reinforcing your understanding of the proper treatment techniques and considerations, you become well poised to provide the ongoing support and expertise necessary for the operations and growth of a successful laser hair removal facility.

At the completion of this one day seminar, you receive the required log sheets, totaling 100 observed treatments, allowing you to submit your completed application to the state of Texas.

ADMISSION REQUIREMENTS

- Completion of state approved and recognized 40 hour laser hair removal training
- Current licensure in the state of Texas as a Laser Hair Removal Technician
- Proficiency in English or Spanish

EQUIPMENT ACCESS

Our students enjoy access to our state-of-the-art facilities, with several of the most sophisticated LHR machines available:

- Long pulse Alexandrite Laser Systems
- Long pulse Nd: YAG Laser Systems
- Diode Laser Systems
- Epidermal Cooling Systems

TUITION FEE INCLUDES

- Comprehensive hands-on practicum, providing for the direct supervision of 100 treatments
- Review and application of intake, consultations and informed consent agreements
- Reinforcement of treatment settings, with optimization for safety, effectiveness and client comfort
- Administration of post care instructions as well as the reinforce best practice considerations
- Treatment logs for completion of licensing application

TUITION

\$250

CLASS DAYS

The 100 Treatment Seminar provides an extensive hands-on learning experience in a practical setting in order to become licensed as a Senior Laser Hair Removal Technician.

To find upcoming class dates and to enroll online, please visit our website. We offer a user-friendly on-line enrollment process to ensure a seamless registration experience.

Additionally, if you require alternative class dates to accommodate your scheduling needs, please feel free to contact us. Our team will be more than happy to assist you and provide you with additional class options.

COURSE OBJECTIVES

01

Students will gain the learned perspective of providing direct and instructional guidance to a newly certified laser hair removal technician.

02

By providing direct supervision, the student now becomes the teacher, helping to reinforce and further one's own understanding of the key principles of laser hair removal.

03

A demonstrated ability to take upon a leading role at the student's business or place of employment with the experience to train professional colleagues alike.

04

As the treatments are overseen by one of our Professional Technicians, the student's comprehensive understanding of core concepts are further enhanced.

ACHIEVEMENT

The Senior 100 Treatment Practicum represents the third course and is necessary to achieve licensure as a Senior Laser Hair Removal Technician in the state of Texas.

Upon completion, you are able to submit your audited treatment logs to TDLR, along with the requisite application to upgrade your license to the level of a Certified Senior Laser Hair Removal Technician.

As a Senior Technician, you may provide the necessary direct supervision to an Apprentice-in-Training as well as perform the duties of a Professional Technician for a licensed laser facility for up to 44 days, should that facility no longer have its designated Professional Laser Hair Removal Technician.

The licensure process:

1. After achieving licensure as a Laser Hair Removal Technician, you are then able to enroll into the Senior Laser Hair Removal 100 Treatment Practicum.
2. Completion of the 100 Treatment Practicum.
3. Submit application to TDLR - including the audited supervised treatment log sheets as provided by the Texas Laser Institute.
4. Receive your license from TDLR as a Certified Senior Laser Hair Removal Technician. Online applications usually reduces processing time to no more than a few business days.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

Complete course calendar is available on our website or by contacting our office.

We're here to assist you, so please never hesitate to reach out. We're looking forward to hearing from you!

E-mail: enroll@texaslasers.com
Web: www.texaslasers.com

PROFESSIONAL LASER TECHNICIAN

In the state of Texas, the Certified Professional Laser Hair Removal Technician represents the highest level of licensure. As a Licensed Professional, you are able to perform supervised treatments (for an Apprentice-In-Training), provide the necessary audit for a technician's 100 supervised treatments in order to elevate to a Senior Technician, provide treatments without the presence of another professional technician or physician, and finally, serve in the capacity as a Professional Technician to meet a facility's licensure requirements.

To achieve certification as a Professional Laser Hair Removal Technician, you must successfully complete a qualifying examination at a state approved certifying entity, such as the Texas Laser Institute. Once obtained, you can then submit an application to TDLR to become appropriately licensed.

ADMISSION REQUIREMENTS

- Current licensure in the state of Texas as a Senior Laser Hair Removal Technician
- Proficiency in English or Spanish.

EQUIPMENT ACCESS

Students enjoy a comprehensive review online via our student portal. The review materials include both written and video based content to elevate and reinforce the key principles of laser hair removal.

Upon the completion of the online resources, the student is well positioned to complete the professional certification examination.

TUITION FEE INCLUDES

- Comprehensive online course review materials.
- Pre-examination assessment with real-time feedback.
- Upon successful completion, a certificate as a Professional Technician is awarded.

TUITION

\$200

WRITTEN EXAM

Upon completion of the online review materials, an in-person or online written examination will be administered to assess your knowledge and understanding of the course content. This examination comprises a combination of 75 multiple-choice and true/false questions.

To obtain certification as a Professional Technician, you need to achieve a minimum passing score of 70% on the examination.

To get started, enroll today to gain access to the comprehensive online review materials. When ready to take the examination, simply contact our team to schedule a time for your assessment or to provide online access through our online training portal.

COURSE OBJECTIVES

01

To further reinforce, through online case study, the student's comprehension of industry best practices and a strong theoretical understanding for the key principles of laser hair removal.

02

Gain shared insight to a range of practical scenarios, particularly the most appropriate response to adverse client outcomes that may arise.

03

Provide and reinforce industry best practices, with focus on consistency through well developed written safety protocols and procedures for your aesthetic practice.

04

Elevate your perspective of performing a supervisory role, ensuring the safe and effective application of laser hair removal.

ACHIEVEMENT

The Professional Laser Hair Removal Certification represents the fourth and final step to achieving the highest level of licensure in the state of Texas.

Upon the successful completion of the certification examination, you are able to submit your certificate to TDLR, along with the requisite application and fee to upgrade your license to the level of a Certified Professional Laser Hair Removal Technician.

As a Professional Technician, you may:

- Provide the necessary direct supervision to an Apprentice-In-Training.
- Provide the necessary audit for a Technician's supervisory treatments.
- Fulfill the licensure requirement as the named Professional for a laser hair removal facility.
- Perform treatments without the presence of any other technician or physician.

The licensure process:

1. After achieving licensure as a Senior Laser Hair Removal Technician, you are then able to enroll into the Professional Laser Hair Removal examination course.
2. Successfully complete the online examination review materials.
3. Sit for the Professional examination, 75 questions in total, and achieve a passing mark of at least 70%.
4. With your certificate, submit the required application to TDLR to become a licensed Certified Professional Laser Hair Removal Technician. Online applications are usually processed within a few business days.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

BODY CONTOURING AND SKIN TIGHTENING SPECIALIST (HYBRID)

Body Contouring & Skin Tightening is a non-invasive technology which targets unwanted fat cells, helping to reduce circumferential body area and, with certain treatment modalities, tighten and firm one's skin.

The Texas Laser Institute offers a comprehensive study of a wide range of treatment options, including: radio frequency (RF), cryolipolysis (CoolSculpting), low energy diode (LED), as well as ultrasound. By taking a holistic study and understanding of the leading technologies, you will gain a thorough appreciation for a wide range of applications and the competing mechanisms of action in destroying unwanted fat. Body contouring is not offered as a weight loss solution but rather as a cutting-edge application of technology that remains non-invasive, offering tangible results without surgical intervention.

The Body Contouring and Skin Tightening Specialist course includes extensive theory and practical hands-on application using the latest technology in non invasive radio frequency, LED, and Ultrasound. Additional consideration for best practices, medical spa operation, managing client expectations as well as shared insights on effective methods for building a successful Body Contouring & Skin Tightening practice are provided.

ADMISSION REQUIREMENTS

- Minimum age for admissions is 18 years of age at the date of application
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite
- Proficiency in English or Spanish
- Students must have training with laser hair removal, aesthetics, and/or the physiology of the skin
- Alternatively, the student may demonstrate experience within non-ablative aesthetics, having received training in a related field, or maintain experience within the medical spa industry

TUITION INCLUDES

- Comprehensive online video presentation, treatment demonstrations and model consultations
- Hands-on practicum
- Model intake, consent and client consultation forms
- Model protocols and procedures
- Certificate of Completion

TUITION

\$395

CLASS DAYS

The Body Contouring Seminar offers a combined 8 hours of theory and practical application, available in either a hybrid (online and in person) or in a fully online format.

Upon enrollment, you will gain online access to course materials and corresponding course videos. The course includes written presentations, videos, and assessment quizzes to help guide our course learning objectives.

During the 4-hour hands-on portion, the instructor reviews the online class materials, addresses questions, and begins the hands-on practicum. Students are then able to apply their learned knowledge to gain real world experience in the classroom.

COURSE OBJECTIVES

01

Learn the comprehensive theory, scientific, and practical techniques necessary to achieve safe and effective body contouring and skin tightening treatments.

02

Understand client qualification and consultation considerations, as well as pre and post-treatment considerations.

03

Receive comprehensive training in the mitigation of post-treatment complications, while managing blood-borne pathogen exposure risks.

04

The opportunity to gain insight into industry best practices, including regulatory considerations and achieving the standard of care.

ACHIEVEMENT

A certificate from the Texas Laser Institute as a Body Contouring and Skin Tightening Specialist will be awarded to each individual with the completion of the necessary course hours, participation in the hands-on practicum (for hybrid participants), and a passing score on the final assessment.

Learn to apply the theory and science of body contouring with extensive practical hands-on application. This seminar is designed for individuals intending to enhance their aesthetic skill set by becoming trained in the use of the latest technology for body contouring and skin tightening through the use of non-invasive radio frequency, LED, and Ultrasound modalities.

Start today by enrolling online at www.texaslasers.com, and receive instant access to your class materials.

Complete course calendar is available on our website or by contacting our office.

We're here to assist you, so do not hesitate to reach out to our administration team to be of service!

IPL PHOTOFACIAL & SKIN REJUVENATION (HYBRID)

IPL stands for Intense Pulsed Light, also known as Photorejuvenation. FDA approved, IPL is a safe, versatile and effective procedure treating everything from a wide range of skin conditions and related ailments such as wrinkles, blemishes, scarring, pore size, rosacea, spider veins, age spots and overall improvement of skin tone and texture. This sought after treatment addresses the specific aesthetic needs of patients, allowing for a meaningful addition to any med spa practice.

The IPL Photofacial & Skin Rejuvenation Specialist seminar offers a comprehensive course of study, with both theory and extensive practical hands-on application. At the completion of the program, an assessment will be administered. A certificate from the Texas Laser Institute as a Professional IPL Photofacial & Skin Rejuvenation Specialist will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

ADMISSION REQUIREMENTS

- Minimum age for admissions is 18 years of age at the date of application
- Students must have attained a high school diploma, GED or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite
- Proficiency in English or Spanish
- Students must have training with laser hair removal, aesthetics, and/or the physiology of the skin
- Alternatively, the student may demonstrate experience within non-ablative aesthetics, having received training in a related field, or maintain experience within the medical spa industry

TUITION INCLUDES

- Comprehensive online video presentation, treatment demonstrations and model consultations
- Hands-on practicum
- Model intake, consent and client consultation forms
- Model protocols and procedures
- Certificate of Completion

TUITION

\$295

CLASS DAYS

The IPL Photofacial & Skin Rejuvenation seminar offers a combined 8 hours of theory and practical application, available in either a hybrid (online and in person) or in a fully online format.

Upon enrollment, you will gain online access to course materials and corresponding course videos. The course includes written presentations, videos, and assessment quizzes to help guide our course learning objectives.

During the 4-hour hands-on portion, the instructor reviews the online class materials, addresses questions, and begins the hands-on practicum. Students are then able to apply their learned knowledge to gain real world experience in the classroom.

COURSE OBJECTIVES

01

Provide students with a comprehensive understanding of selective photothermolysis and its application for Intense Pulsed Light (IPL) and Skin Rejuvenation treatments.

02

Obtain the knowledge and skills necessary to achieve the delicate balance of safety and effectiveness when performing IPL Photofacial treatments.

03

A thorough understanding of client qualification, providing comprehensive consultations, as well as addressing pre and post-treatment considerations for successful outcomes.

04

An exploration of the regulatory environment and safety guidelines within the field, as well as an in-depth understanding of best practices and achieving the standard of care.

ACHIEVEMENT

A certificate from the Texas Laser Institute as a Professional IPL Photofacial & Skin Rejuvenation Specialist will be awarded to each individual with the completion of necessary course material, hands-on practicum (hybrid classes) and a passing score on the final assessment.

As a Professional IPL Photofacial & Skin Rejuvenation Specialist, you may:

1. Apply the theory, science and practice of Intense Pulsed Light to achieve safe and effective treatments using a multitude of light-based machines.
2. Understand the interaction of light within competing chromophores.
3. Conduct client consultations.
4. Determine treatments settings and protocols appropriate for IPL Photofacials and skin rejuvenation treatments.
5. Address pre and post-treatment considerations.
6. Properly respond to treatment complications.
7. Respond to practice setting considerations.

To get started, enroll online today at www.texaslasers.com and receive instant access to your class materials. Contact us with any questions.

PROFESSIONAL TATTOO REMOVAL SPECIALIST (HYBRID)

Did you know? Nearly 35% of people, including half of millennials in America, have at least one tattoo - with as many as 20% of them unhappy with their decision.

Lasers remove tattoos by breaking up unwanted pigment with high-intensity pulses of light. This technique can lighten tattoos with minimal side effects. The number of treatments will depend on age, size, color of tattoo, and skin tone.

The Professional Tattoo Removal Specialist course offers a comprehensive seminar, with both theory and extensive practical hands-on application with Q-Switched lasers, further exploring the latest advances in laser technology, in the achievement of the safe and effective removal of unwanted ink. Additional consideration provided for pigmentation correction.

Becoming a Professional Tattoo Removal Specialist opens greater versatility to practice capabilities, as well as an expanded ability to provide greater value to your customers.

ADMISSION REQUIREMENTS

- Minimum age for admissions is at least 18 years of age at the date of application
- Students must have attained a high school diploma, GED, or equivalent. Student may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite
- Proficiency in English or Spanish
- Students must have previous training with tattoos, laser hair removal, aesthetics, and/or the physiology of the skin. Alternatively, the student may demonstrate experience within non-ablative aesthetics, having received training in a related field, or maintain experience within the medical spa industry

TUITION INCLUDES

- Comprehensive online video presentation, treatment demonstrations and model consultations
- Hands-on practicum with Q-switched Lasers
- Model intake, consent and client consultation forms
- Model protocols and procedures
- Certificate of Completion

TUITION

\$295

CLASS DAYS

The Professional Tattoo Removal Specialist seminar offers a combined 8 hours of theory and practical application, available in either a hybrid (online and in person) or in a fully online format.

During the 4-hour hands-on portion, the instructor reviews the online class materials, addresses questions, and begins the hands-on practicum. Students are then able to apply their learned knowledge to gain real world experience in the classroom.

COURSE OBJECTIVES

01

A comprehensive understanding of selective photothermolysis and an in-depth exploration of its application specifically for tattoo removal treatments.

02

Enable students to achieve a delicate balance between the thermal relaxation time of target chromophores and the surrounding skin for optimal treatment outcomes.

03

Extensive training in addressing pre and post-treatment complications, as well as the exploration of client qualifications and consultations.

04

Students will gain knowledge the regulatory environment and laser safety, as well as essential practice considerations in the field of laser-based procedures.

ACHIEVEMENT

At the completion of the program, an examination will be administered. A certificate from the Texas Laser Institute as a Professional Tattoo Removal Specialist will be awarded to each individual with the completion of necessary course hours and a passing score on the examination.

As a Professional Tattoo Removal Specialist, you may:

1. Understand the interaction of light within competing chromophores.
2. Conduct client consultations.
3. Determine treatments settings and apply protocols appropriate for the removal of unwanted ink.
4. Address pre and post treatment considerations.
5. Properly respond to treatment complications.
6. Shape practice setting considerations

NEUROTOXIN & FACIAL FILLERS- BEGINNER

Botox® is an FDA-approved drug made from a neurotoxin by the bacterium, Botulinum toxin. In medical and dental settings, it is used to treat certain medical conditions, such as excess sweating, migraines, muscular disorders. In medical spa settings, it is used cosmetically to treat wrinkles by essentially paralyzing the muscles generally applied to the folds/wrinkles of the forehead, cheeks, eye and mouth areas. Facial Fillers are comprised of hyaluronic acid (HA), and are largely used to restore facial fullness and to achieve lip enhancement.

With more than 10 million treatments administered per year, becoming a Botox® and Facial Filler Specialist prepares you to administer the most popular non-surgical cosmetic treatment. Thousands of medical professionals have successfully integrated these safe and non-surgical aesthetic procedures within their practice.

The Botox® and Facial Fillers Specialist: Beginner-Intermediate program offers a comprehensive seminar, with both theory and extensive practical hands-on application. The student will be able to properly diagnose and safely reduce frown lines, glabellar lines while also correcting nasolabial folds and the fundamental considerations of lip contouring with facial filler.

ADMISSION REQUIREMENTS

- Minimum age for admissions is at least 18 years of age at the date of application
- Students must have attained a high school diploma, GED, or equivalent. Students may show current enrollment in a program or attainment of licensure or education where a high school diploma served as a prerequisite
- Proficiency in English or Spanish
- Students must possess licensure as either a physician, a physician assistant, a nurse practitioner, a registered nurse, or a licensed vocational nurse. A prospective student that does not maintain licensure to practice medicine may also enroll in the seminar if she/he satisfies the first three requirements and works underneath the direct supervision of a physician.

TUITION FEE INCLUDES

- Comprehensive materials, including all product
- Online lectures and demonstrations
- Model intake sheets & consent sheets
- Real hands-on practice with models
- Model protocols and procedures
- Certificate of completion

TUITION

\$1500

CLASS DAYS

Certification as a Professional Cosmetic Injector Specialist – Beginning to Intermediate is gained through the enrollment of our one (1) day, eight (8) hour seminar, with completion of both theory and extensive practical hands-on application.

At the completion of the program, an oral assessment following demonstrated competency will be provided

There are no special requirements for completion of the seminar other than to complete at least 95% of the classroom hours, take active part in class discussion and the hands-on practicum, as well as to demonstrate safe use and injection technique for Botulinum Toxin-A and Facial Filler product.

COURSE OBJECTIVES

01

Provide students with a comprehensive understanding of the history and development of Botox®, Dysport®, and Xeomin, as well as the history and use of hyaluronic acid.

02

Understand the mechanisms of action, ensuring safety and efficacy, accurately applying dilution tables and syringe options, while gaining a strong foundation in facial anatomy.

03

Conduct evaluations and consultations, setting proper expectations. Learn and demonstrate proficiency in several injection techniques.

04

Students will gain knowledge of regulatory considerations, pricing, practice considerations, and marketing methods in order to ensure the growth and success of their aesthetic business.

ACHIEVEMENT

A certificate from the Texas Laser Institute as a **Professional Cosmetic Injector Specialist** will be awarded to each individual with the completion of the necessary course of instruction.

As a Professional Cosmetic Injector Specialist, you may:

1. Properly diagnose and safely inject Botulinum Toxin - A for the treatment of frown lines and glabellar lines.
2. Properly diagnose and safely inject facial filler product (hyaluronic acid) for soft tissue augmentation for the volume enhancement and correction of nasolabial folds, marionette lines and fundamental lip augmentation.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

Complete course calendar is available on our website or by contacting our office.

DERMAPLANING & LIQUID ENZYME EXFOLIATION (HYBRID)

Dermaplaning is a procedure that exfoliates the skin (or epidermis) by removing dead skin and vellus hair (peach fuzz). The procedure is performed by an aesthetician or trained aesthetic professional, who will gently glide a scalpel across the skin, yielding a renewed and more youthful appearance. The procedure is most often used on clients with rough or dry skin, superficial hyperpigmentation, mild acne scarring or fine lines and wrinkles.

Liquid enzymes work by removing dead skin cells from the epidermis by breaking down the protein bonds between dead skin cells and the epidermis, both painlessly and without acute side effects.

Dermaplaning and Liquid Enzyme Specialist certification is a comprehensive seminar, with both theory and extensive practical hands-on application. Following the seminar, the student will be able to provide this fantastic procedure with confidence and care.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Applicants should have prior training in light-based treatments, aesthetics, or skin physiology. Alternatively, they may demonstrate experience in non-ablative aesthetics, related fields, or the medical spa industry.

TUITION FEE INCLUDES

- Comprehensive materials, including all product
- Online lectures and demonstrations
- Model intake sheets & consent sheets
- Real hands-on practice with models
- Model protocols and procedures
- Certificate of completion

TUITION

\$295

CLASS DAYS

The Dermaplaning & Liquid Enzyme Exfoliation Specialist Seminar provides a total of 8 hours of combined theory and practical training, available in two formats: hybrid (online and in-person) or fully online.

Upon enrollment, students gain access to online course materials and instructional videos. The course includes written presentations, videos, and quizzes to support the learning objectives.

For those participating in the 4-hour hands-on portion, the instructor will review the online materials, answer any questions, and guide the hands-on practicum.

Students will then apply their newly acquired knowledge in a real-world, classroom setting.

COURSE OBJECTIVES

01

Develop a deeper understanding of the skin's anatomy and physiology, enhancing your ability to perform safe and effective exfoliation treatments with greater precision and care.

02

Gain insight into the skin's aging process, enabling you to empower your clients with personalized skincare routines and tailored exfoliation treatments for optimal results.

03

The ability to provide mechanical exfoliation to the skin by dermaplaning and the application of liquid enzymes with proper technique and knowledge to optimize treatment outcomes

04

A comprehensive understanding of the safety considerations, pre-treatment optimization, post treatment as well as addressing and skin reactions to treatment

ACHIEVEMENT

Upon successful completion of the program, participants will be awarded a certificate from the Texas Laser Institute, recognizing them as a **Professional Dermaplaning & Liquid Enzyme Exfoliation Specialist**. This certificate is granted upon the completion of the required course hours and passing the final assessment.

As a Professional Dermaplaning & Liquid Enzyme Exfoliation Specialist, you may:

1. Apply the theory, science, and practical techniques of exfoliation using chemical or mechanical methods to deliver safe and effective treatments.
2. Understand the interaction of exfoliants within the layers of the epidermis.
3. Conduct client consultations.
4. Determine optimal treatment protocols.
5. Address pre and post-treatment considerations and complications.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

FIBROBLAST PLASMA SKIN LIFT

The Fibroblast Plasma Lift is an effective, non-surgical treatment for individuals looking to address pronounced signs of aging.

What is a fibroblast? Fibroblasts are cells responsible for producing collagen and other fibers in connective tissue, which are essential for maintaining the skin's firmness and elasticity. This procedure stimulates fibroblasts to boost collagen production, improving both the appearance and texture of the skin.

The Professional Fibroblast Plasma Lift Specialist course spans two days, offering a comprehensive seminar that includes both theoretical instruction and extensive hands-on practice.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Applicants should have prior training in light-based treatments, aesthetics, or skin physiology. Alternatively, they may demonstrate experience in non-ablative aesthetics, related fields, or the medical spa industry.

TUITION FEE INCLUDES

- Comprehensive materials, including all product
- Online lectures and demonstrations
- Model intake sheets & consent sheets
- Real hands-on practice with models
- Model protocols and procedures
- Practice Fibroblast Pen
- Certificate of completion

TUITION

\$1295

CLASS DAYS

The Professional Fibroblast Plasma Lift Specialist Seminar provides 16 hours of combined theory and practical training, available in two formats: hybrid (online and in-person) or fully online.

Upon enrollment, students receive online access to course materials and accompanying videos. The course includes written presentations, videos, and quizzes to support the learning objectives.

For those participating in the 8-hour hands-on portion, the instructor will review the online materials, answer questions, and guide the hands-on practicum. Students will then apply their newly acquired knowledge through real-world experience in the classroom.

COURSE OBJECTIVES

01

Students will develop a comprehensive understanding of the historical context, theoretical foundations, and practical application of the Plasma Lift technique.

02

Develop proficiency in the technique, treatment settings, and contraindications, benefits, and uses associated with Fibroblast Plasma Lift treatments.

03

Incorporate best practices and considerations to achieve optimal outcomes when performing Fibroblast Plasma Lift treatments.

04

Review of the regulatory environment, assess safety protocols, and consider best practices when introducing Fibroblast Plasma Lift treatments to your practice.

ACHIEVEMENT

Upon successful completion of the program, participants will receive a certificate from the Texas Laser Institute, recognizing them as a **Professional Fibroblast Plasma Lift Specialist**. This certificate is awarded after completing the required course hours and passing the final assessment.

As a Professional Fibroblast Plasma Lift Specialist, you will be able to:

1. Apply the theory, practice and science of fibroblast stimulation to all suitable skin types in achieving safe and effective Fibroblast Plasma Skin Lift treatments
2. Effectively communicate with your customers the benefits, risks and alternatives to this treatment.
3. Set proper client expectations, manage patient outcomes as well as to provide expertise in shaping the most optimal anti-aging treatment plans for your patients.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

Complete course calendar is available on our website or by contacting our office. We're here to assist you!

Web: www.texaslasers.com

MICRONEEDLING & MICRODERMABRASION

Microneedling, also known as collagen induction therapy, is a cosmetic procedure that utilizes a device with fine needles to create small, controlled injuries on the skin's surface. This process stimulates the body's natural wound healing response, resulting in increased production of collagen and elastin—essential proteins that contribute to the skin's structure and elasticity.

Microdermabrasion is a non-invasive cosmetic procedure designed to enhance the overall texture and appearance of the skin. It involves a handheld device that exfoliates and removes the outermost layer of dead skin cells through a mechanical or abrasive process.

The Professional Microneedling & Microdermabrasion Specialist Course offers a comprehensive seminar that combines both theoretical instruction and extensive hands-on practice. The course includes protocols developed by TLI, with a special focus on a combined treatment approach that incorporates microneedling along with diamond-tipped microdermabrasion to achieve optimal improvements in skin tone and complexion.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Applicants should have prior training in light-based treatments, aesthetics, or skin physiology. Alternatively, they may demonstrate experience in non-ablative aesthetics, related fields, or the medical spa industry.

TUITION FEE INCLUDES

- Comprehensive materials, including all product
- Online lectures and demonstrations
- Model intake sheets & consent sheets
- Real hands-on practice with models
- Model protocols and procedures
- Certificate of completion

TUITION

\$295

CLASS DAYS

The Professional Microneedling & Microdermabrasion Seminar provides a total of 8 hours of combined theory and practical application, offered in either a hybrid format (online and in-person) or a fully online format.

Upon enrollment, participants will gain access to online course materials and corresponding videos. The course includes written presentations, videos, and assessment quizzes designed to support the learning objectives.

During the 4-hour hands-on portion, the instructor will review the online class materials, address questions, and guide students through the hands-on practicum.

COURSE OBJECTIVES

01

To gain a comprehensive understanding of the benefits of mechanical dermabrasion through microneedling and microdermabrasion, with consideration for device selection.

02

Proper technique for the safe and effective administration of microneedling and microdermabrasion treatments. Additional review and certification for blood borne pathogen risks

03

Client selection, with command of contraindications of treatment as well as setting proper client expectations. Pre treatment optimization as well as post treatment care instructions.

04

Regulatory review as well industry best practices. Recognition of the standard of care as well as recognizing and addressing post treatment complications.

ACHIEVEMENT

At the successful completion of the program, a certificate from the Texas Laser Institute as a **Professional Microneedling & Microdermabrasion Specialist** will be awarded to each individual with the completion of the necessary course hours and final assessment.

As a Professional Microneedling & Microdermabrasion Specialist, you will be able to:

1. Provide comprehensive consultations with clients, setting proper treatment expectations while understanding the risks and alternatives to the treatment.
2. Maintain clean and sanitized treatment spaces, with best practices for device sanitation.
3. Explore pre and post treatment considerations to optimize treatment outcomes.
4. Review of the regulatory environment, best practices as well as practice considerations.

To get started, enroll on-line today at www.texaslasers.com, and receive instant access to your class materials.

And please contact us with any questions. We're here to assist you!

PROFESSIONAL BB GLOW SPECIALIST (HYBRID)

What is BB Glow? BB Glow is a semi-permanent foundation that also serves as a lightening and brightening treatment for the face. This innovative procedure utilizes scientifically proven nano-needling technology to safely infuse nutrient-rich BB serum into the top layer of the skin. The treatment provides light to medium coverage, effectively camouflaging facial imperfections such as hyperpigmentation, redness, dark circles, and large pores. BB Glow is a fun and easy way to achieve the appearance of naturally perfect and glowing skin!

With proper training techniques and procedures, the results of BB Glow treatments can be highly effective, making certification as a Professional BB Glow Specialist a rewarding opportunity. The Professional BB Glow Specialist Program Course offers comprehensive online materials, including both theoretical instruction and extensive practical hands-on application.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Applicants should have prior training in light-based treatments, aesthetics, or skin physiology. Alternatively, they may demonstrate experience in non-ablative aesthetics, related fields, or the medical spa industry.

TUITION FEE INCLUDES

- Comprehensive materials
- Online lectures and demonstrations
- Complete BB Glow Kit, with nano applicator device
- Model intake sheets & consent sheets
- Real hands-on practice with models
- Model protocols and procedures
- Certificate of completion

TUITION

\$595

CLASS DAYS

The Professional BB Glow Seminar consists of a total of 8 hours of combined theory and practical application, available in two formats: hybrid (online and in-person) or fully online.

Upon enrollment, participants will receive online access to course materials and related videos. The course features written presentations, videos, and assessment quizzes to support the learning objectives.

During the 4-hour hands-on portion, the instructor will review the online materials, address any questions, and guide students through the hands-on practicum. This allows students to apply their acquired knowledge and gain real-world experience in a classroom setting.

COURSE OBJECTIVES

01

Gain a comprehensive understanding of the concepts and practices involved in BB Glow application, including the foundational ingredients and application techniques.

02

Learn to identify client qualifications and consultation considerations, along with essential safety, sterilization, and sanitation practices.

03

Explore BB Glow artistry considerations, including eye shaping and lip design techniques. The course will also cover general makeup principles, including advanced color theory.

04

Engage in a discussion about the regulatory environment surrounding BB Glow treatments, including the implementation of safety protocols and adherence to best practice standards.

ACHIEVEMENT

Upon successful completion of the program, participants will receive a certificate from the Texas Laser Institute, recognizing them as a **Professional BB Glow Specialist**. This certificate is awarded after completing the required course hours and passing the final assessment.

As a Professional BB Glow Specialist, you will be able to:

1. Apply the theory, science and practice of properly applying semi-permanent foundation, allowing clients to achieve lightening and brightening to their skin.
2. Treatment will provide light to medium coverage to camouflage facial imperfections including hyperpigmentation, redness, dark circles and large pores.
3. Implement essential practice considerations while gaining insights into effective methods for building a successful BB Glow practice.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

Complete course calendar is available on our website or by contacting our office. We're here to assist you, so contact us today!

PROFESSIONAL MICROBLADING SPECIALIST

Microblading is a tattooing technique that utilizes a small handheld tool with several tiny needles to apply semi-permanent pigment to the skin. Unlike traditional eyebrow tattooing, microblading involves creating each hair stroke by hand with a blade, which makes fine slices in the skin. This technique is primarily used on eyebrows to create, enhance, or reshape their appearance in terms of both shape and color.

The Professional Microblading Specialist Course spans three days and teaches the fundamental techniques for applying natural, hair-like strokes to the brows. The curriculum includes training in color theory, manual application techniques, and selecting the appropriate pigments to match skin undertones. Students will learn design techniques and their application by working with live models.

This course is designed to train and educate students on proper application methods and understanding the healing process. Additionally, it includes presentations on tattoo salon operations, providing insights into effective methods for building a successful microblading practice.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Applicants should have prior training in non-invasive cosmetic treatments or make-up artistry.

TUITION FEE INCLUDES

- Comprehensive online and published classroom materials
- Full size personal microblading kit, including measuring tools, pigments, and applicators
- Model documents and forms
- Hands-on practice with live models
- Certificate of Completion

TUITION

\$1995

CLASS DAYS

Training in Microblading is a 3-day hybrid seminar that includes both theoretical instruction and extensive practical hands-on application. The first day is conducted online and is self-paced, followed by two in-person days dedicated to thorough hands-on training.

There are no special requirements for course completion beyond attending at least 95% of the classroom hours, actively participating in class discussions and the hands-on practicum, and demonstrating safe use of microblading methodology through class discussion and hands-on practice.

Additionally, students will receive certification for controlling bloodborne pathogen risk exposure.

COURSE OBJECTIVES

01

Mastering the art of applying natural, hair-like strokes to the brows. Through practice, you will be able to provide professional services with precision and artistry.

02

You will acquire a comprehensive set of skills in manual application techniques, matching pigments to skin undertones, and design techniques and the measurement process.

03

You will gain a well-rounded understanding of color theory, enabling you to make informed color choices while supporting your clients throughout the healing and touch-up process.

04

Students will develop a comprehensive understanding of practice considerations as well as blood-borne pathogen exposure risk and controls.

ACHIEVEMENT

Upon successful completion of the program, participants will receive a certificate from the Texas Laser Institute, recognizing them as a **Professional Microblading Specialist**. This certificate is awarded after fulfilling the required course hours and hands-on treatments.

As a Professional Microblading Specialist, you will be able to:

1. Apply the theory, science, and practice of permanent and semi-permanent eye-brow shaping to ensure the safe and effective application of permanent makeup using a microblading tool and a selection of suitable pigments.
2. Understand the interaction of injected pigmentation within the skin.
3. Conduct client consultations to set proper expectations as well as to review risks and alternatives to treatment.
4. Address pre and post-treatment considerations and complications.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

SEMI-PERMANENT MAKEUP EYEBROW SHADING & OMBRE

Eyebrow Shading & Ombre is one of the hottest trends in semi-permanent makeup. The technique gives eyebrows a soft, shaded look while providing definition and depth to the brows. As not every skin type is appropriate for microblading, this advanced technique provides much lighter application that mimics hair-like strokes. Alternatively, Eyebrow Shading & Ombre can be combined with Microblading for results from subtle to bold brows, achieving a remarkably defined look.

The Professional Semi-Permanent Eyebrow Shading & Ombre Course offers comprehensive training in the techniques and application processes necessary to achieve beautiful brows. The curriculum includes advanced color theory, with a particular emphasis on selecting optimal pigments to match various skin undertones.

Tuition covers all course materials, tools, products, a tattoo machine, and a full-sized personal kit. Additionally, the course provides intensive demonstrations and hands-on practice on both practice skins and live models.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Existing certification or experience in Microneedling.
- Applicants should have prior training in non-invasive cosmetic treatments or make-up artistry.

TUITION FEE INCLUDES

- Comprehensive online and published classroom materials
- Full size personal microblading kit, including measuring tools, pigments, and applicators
- Model documents and forms
- Hands-on practice with live models
- Certificate of Completion

TUITION

\$1500

CLASS DAYS

Training in the Professional Semi-Permanent Make-up Specialist – Eyebrow Shading & Ombré course is a 2-day seminar totaling 16 hours, combining both theoretical instruction and extensive hands-on practical application.

There are no special requirements for course completion beyond attending at least 95% of the classroom hours, actively participating in class discussions and the hands-on practicum, and demonstrating safe use of eyebrow shading methodology through class discussion and hands-on practice.

COURSE OBJECTIVES

01

Students will thrive in the field of semi-permanent makeup artistry by focusing on both theoretical knowledge and practical application of the most effective techniques for creating perfectly shaped brows..

02

Deepen your understanding of color theory by concentrating on layering techniques to balance undertones and exploring combination treatment options.

03

Master advanced brow shading and ombré techniques, including pattern design and stretching methods, to create stunning brow enhancements.

04

Engage in ongoing review and study of skin anatomy, healing processes, and strategies for preventing, recognizing, and addressing post-treatment complications.

ACHIEVEMENT

At the successful completion of the program, a certificate from the Texas Laser Institute as a **Professional Semi-Permanent Eyebrow Shading & Ombré Specialist** will be awarded to each individual with the completion of the necessary course hours and participation.

As a Professional Semi-Permanent Eyebrow Shading & Ombré Specialist, you will be able to:

1. Apply the theory, science and practice of semi-permanent cosmetic tattooing - achieving natural-looking, long-lasting eyebrow shading with advanced ombré techniques
2. Understand the interaction of injected pigmentation within the appropriate layer of the skin.
3. Conduct client consultations to set proper expectations as well as to review risks and alternatives to treatment.
4. Address pre and post-treatment considerations and complications.

To get started, enroll online today at www.texaslasers.com, and receive instant access to your class materials.

SEMI-PERMANENT MAKEUP CLASSIC EYELINER & FULL LIPS

The Professional Semi-Permanent Makeup Specialist course offers a comprehensive seminar, with both theory and extensive practical hands-on application. Semi-permanent makeup, also known as micro pigmentation, is a form of temporary cosmetic tattooing which allows long-lasting eyeliner and full lip coloring.

Semi-permanent eyeliner creates natural looking defined eyes without the constant smearing and smudging of traditional pencil eyeliners. While replacing lip's lost border gives a more youthful, fuller pout appearance without injections, leaving a beautiful hue and thereby reducing the need for lipstick. Based on the skin's aging this technique can last up to 3 years.

This 3 day Semi-Permanent Makeup Classic Eyeliner & Full Lips course includes all course materials, tattooing machine, full size kit, as well as insights on effective methods for building a successful Semi-Permanent Makeup practice.

ADMISSION REQUIREMENTS

- Applicants must be at least 18 years old at the time of application.
- A high school diploma, GED, or equivalent is required. Alternatively, students may provide proof of current enrollment in a program or show licensure or education where a high school diploma was a prerequisite.
- Proficiency in either English or Spanish is required.
- Existing certification or experience in Microneedling or eyebrow shading.
- Applicants should have prior training in non-invasive cosmetic treatments or make-up artistry.

TUITION FEE INCLUDES

- Comprehensive online and published classroom materials
- Full size personal semi-permanent makeup kit, including measuring tools, pigments, and applicators
- Model documents and forms
- Hands-on practice with live models
- Certificate of Completion

TUITION

\$2100

CLASS DAYS

Training in Professional Semi-Permanent Makeup - Classic Eyeliner & Full Lips is a 3-day hybrid course. The first day features online presentation of course materials, while the remaining two days focus on extensive hands-on practice and live model application.

There are no special requirements for course completion beyond attending at least 95% of the classroom hours, actively participating in class discussions and the hands-on practicum, and demonstrating safe use of semi-permanent makeup techniques through class discussion and hands-on practice.

COURSE OBJECTIVES

01

Mastering the art of applying natural eyeliner and full lip shading with semi-permanent ink. Through practice, you will be able to provide amazing treatments safely and effectively.

02

Students will develop proficiency in client qualification and consultation, eye shape and lip design, and safety, sterilization, and sanitation.

03

Students will gain an extensive understanding of pre and post-treatment considerations, and addressing post-treatment complications.

04

Students will be well-prepared with a comprehensive understanding of the regulatory environment, blood-borne pathogens risk, and best practice considerations.

ACHIEVEMENT

At the successful completion of the program, a certificate from the Texas Laser Institute as a **Professional Semi-Permanent Makeup Eyeliner & Lips Specialist** will be awarded to each individual with the completion of the necessary course hours and final assessment.

As a Professional Semi-Permanent Makeup Eyeliner & Lips Specialist, you will be able to:

1. Apply the theory, science and practice of semi-permanent cosmetic tattooing - achieving natural-looking, long-lasting eyeliner and lip enhancement with advanced considerations of color theory, symmetry and artistry.
2. Understand the interaction of injected pigmentation within the appropriate layer of the skin.
3. Conduct client consultations to set proper expectations as well as to review risks and alternatives to treatment.
4. Address pre and post-treatment considerations and complications..
